

## Accessories

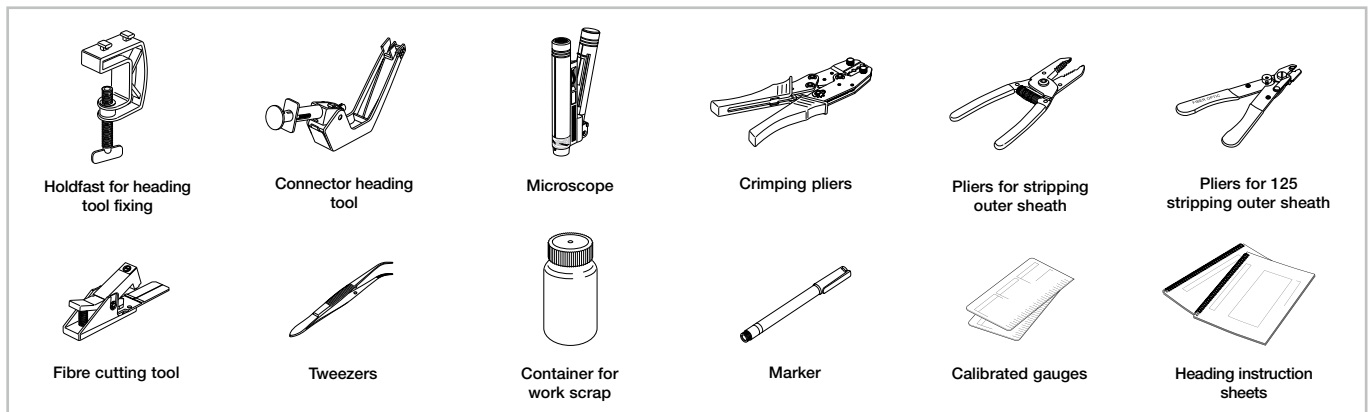

### Tool kit and fiber-optic accessories

The 03255 tool kit contains all of the tools needed to terminate buffered and sheathed fiber-optic. Packaged in a practical carrying case, it also contains a practice CD/R for SC and ST connector installations.

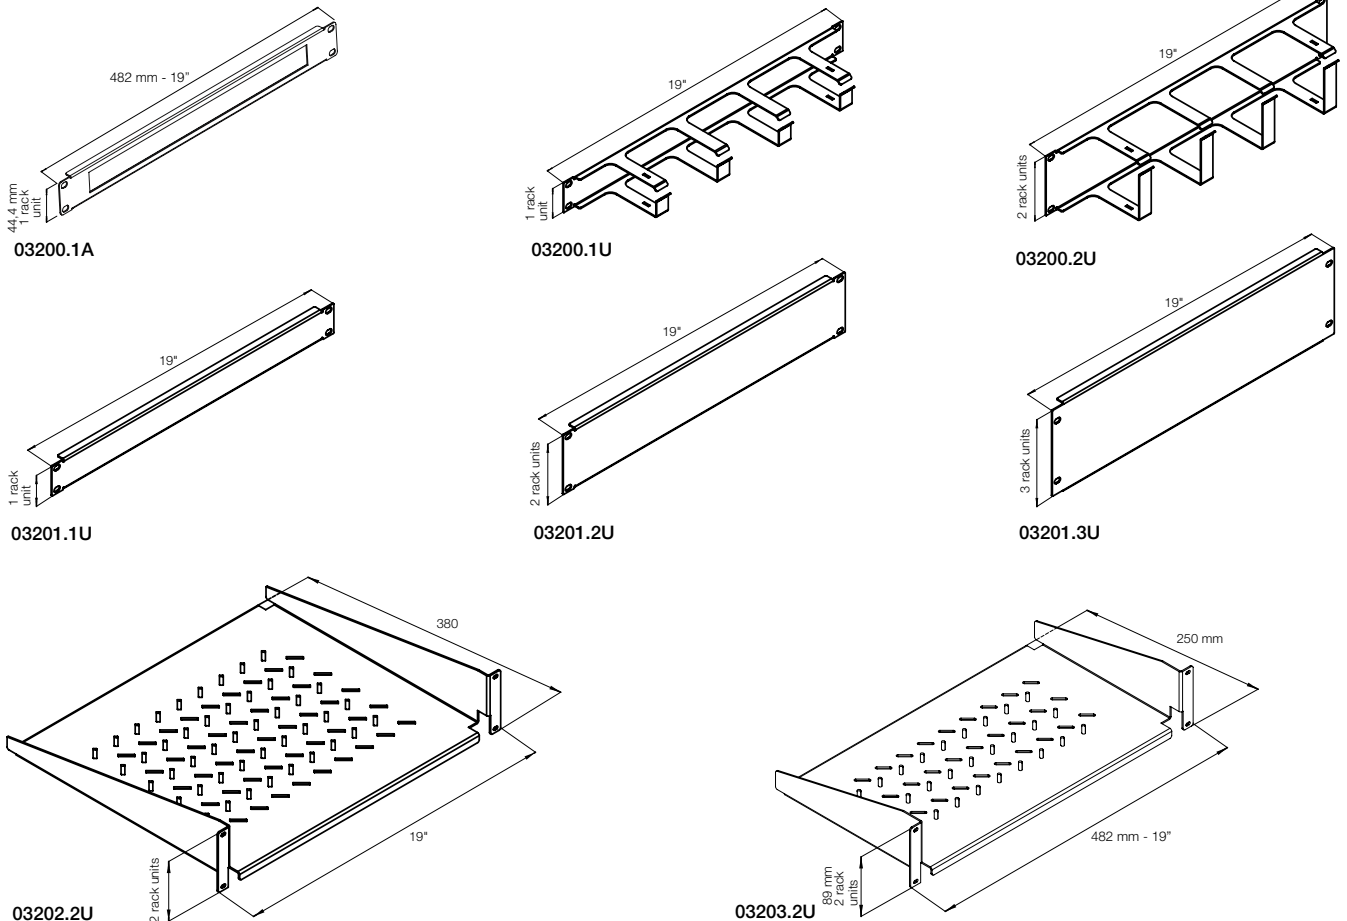

### Technical specifications

- fast execution of fiber heading
- on-site fiber heading
- heading possible at any temperature
- no lapping required
- does not require the use of resins or the crystallization oven, thus there is no handling of toxic materials and it is not necessary to issue any specific documentation
