

Devices - TECHNICAL CHARACTERISTICS

Relay actuator

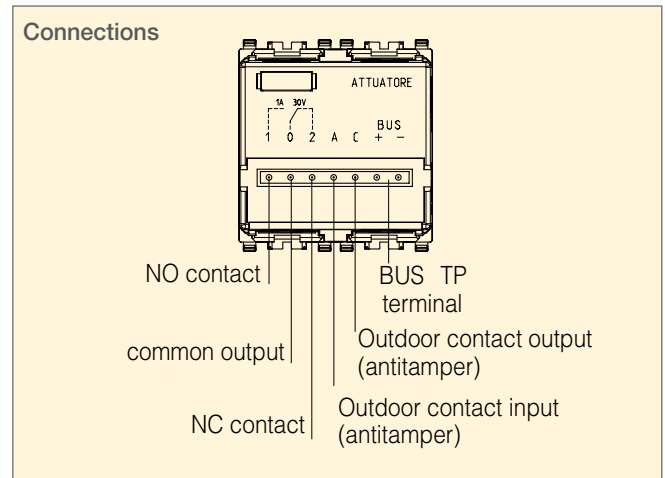

The relay actuator is a device that, thanks to the clean contacts of the fitted relay, is able to broadcast various types of alarm signals based on the assigned configuration. It may be used to activate a telephone dialler, broadcast the system status (active, inactive, in alarm, etc), control optic and/or acoustic signals (in advanced applications) etc.

Technical specifications

- rated voltage (Vn): BUS 20-30 V d.c.
- protection degree: IP30
- operating temperature: -5 - +45 °C (for indoor use)
- mounting: flush or surface (with 09975...)
- protection type: against opening and removal, with built-in optic tamperproof device
- absorption: 5 mA
- output relay: 1 A 30 V

Conformity to Standards

EMC Directive,
EN 50130-4, EN 61000-6-3 Standards

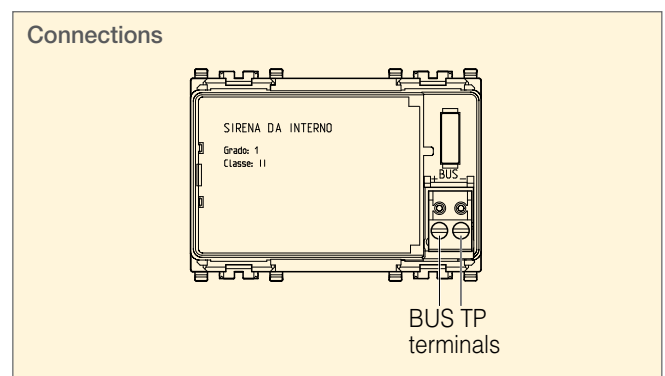

Indoor siren

The indoor siren trips an audible sound signal when the system detects an alarm. The device is self-powered and is supplied from 3 AAA Ni-MH rechargeable batteries.

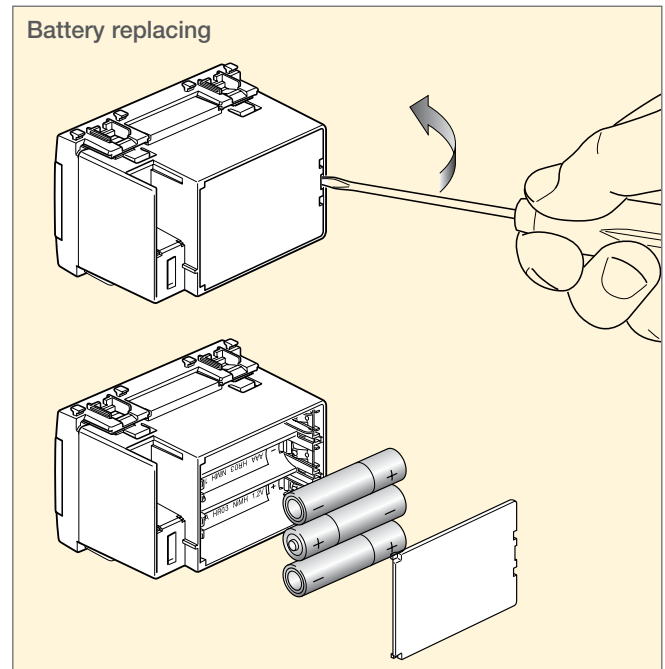

Technical specifications

- rated voltage (Vn): BUS 20-30 V d.c.
- protection degree: IP30
- operating temperature: -5 ÷ +45 °C (for indoor)
- installation: flush and surface mounting (with 09975...)
- protection type: against opening and removal, with built-in optic tamperproof device
- absorption: 10 mA in stand-by; 20 mA max with flat batteries
- sound power at 3 m (service warning): > 80 dB (A)
- possibility of 4 different type of sound to link to different kind of alarms
- warning for activation, deactivation and partialisation
- configuration button
- signalling LED

Conformity to Standards

EMC Directive,
EN 50130-4, EN 61000-6-3 Standards
