Design

**EVERYTHING OF VALUE HAS A**

**ARKÉ**

A unique and  
ever-contemporary character.

ARKÉ METAL  
A strong and  
innovative personality.

HEART. ARKÉ HAS TWO.

Design

**Arké.**  
**White or anthracite grey?**  
**To achieve beauty is**  
**to follow one's own taste.**

These two timeless colours suit any room,  
in harmony with the style of the interiors,  
with a contemporary charm and infinite  
combination possibilities.

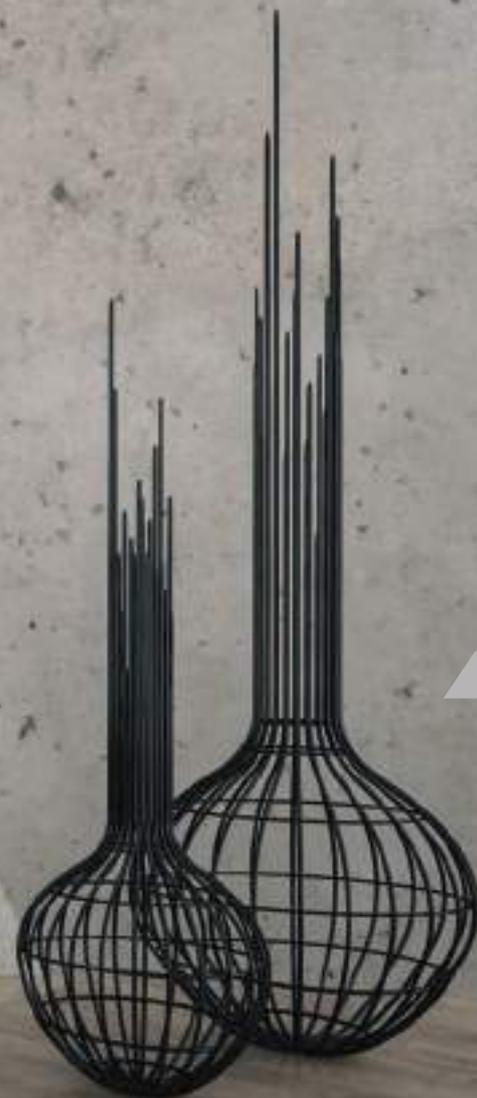

Design

TIMAR

**Arké Metal.  
Warm hues and natural spaces?  
The Metal finish  
fits in perfectly.**

With its strong identity, Metal offers original textural combinations that perfectly interpret and enhance the style of interiors characterised by warm, natural colours.

## **Materials and finishes. Expressing the magnitude of Italian creativity.**

Selected durable materials, innovative production processes and the attention to finishes typical of Italian-made goods: a perfect combination, offering a strikingly attractive product that enhances every room with its countless customised versions.

11 Brushed copper

## METAL-ELITE REFINED METAL

Another version of processed zamak.  
A refined interpretation of the most popular metals  
in interior design which, thanks to a special  
treatment, makes the material even shinier,  
now available in four different colour shades.

08 Brushed inox

10 Black nickel

12 Brushed brass

13 Matt champagne

## METAL-COLOR VARNISHED METAL

Cover plates in painted zamak, a material that gives Arké an even more high-tech look.

Four different chromatic versions that cast colour in a starring role.

01 Matt graphite

04 Matt titanium

B06 Polar total look

17 Dark bronze

## ALU-TECH ALUMINIUM

---

Modern and technological, aluminium underlines the contemporary appeal of Arké and is enhanced by three colour versions: natural, lava and dark bronze.

15 Natural Aluminium

16 Lava

## TECNO-BASIC SATIN TECHNOPOLYMER

For Arké, this simple, durable material is associated with elegant and understated shades of black and white, for combinations that never follow fleeting fashions.

71 Black

74 White

## COLOR-TECH PAINTED TECHNOPOLYMER

Technopolymers with a special painted finish offer an intriguing metallic effect. Finishes shine with an elegant vibrancy, enhancing the high-tech style of matt silver and the modernity of metal.

79 Matt silver

IDENTITY IS  
COORDINATED EVEN IN  
THE SMALLEST DETAIL.

Arké cover plates can be customised with logos provided by the client. An option that further enhances the identity of each space.

IMMEDIATE VISIBILITY  
WITH SYMBOLS ON  
BUTTONS.

After choosing from an extensive gallery of symbols depicting the most common functions, laser technology allows symbols to be accurately reproduced on buttons.

MORE THAN  
200 COLOURS.

For metal cover plates, you can choose the colour that best matches the style of the interior. A superb opportunity in line with the latest style trends, enhancing the interior design scheme.

Design

A PERFECTLY  
COORDINATED  
USER EXPERIENCE.

Complete aesthetic coordination  
is also extended to user interfaces,  
with RGB LEDs that let you choose  
the backlighting colour.

**Ample customisation,  
enhancing the identity  
of any space.**

---

To enhance the identity of any building, in keeping  
with the latest trends in interior design, cover plates  
come in numerous colours and are engraved with  
a specific logo while wordings and controls can be  
customised according to the chosen function.

## FUNCTIONS, FOR A CONTEMPORARY LIVING CONCEPT.

Precise, advanced and designed to reduce consumption: Arké devices use the most innovative technologies to make room management simple and intuitive. Thanks to their exceptional performance, everyday actions are more enjoyable and immediate, as demanded by the latest trends in modern living.

## SAFETY FIRST.

All the socket outlets are equipped with an effective and safe protection system. The SICURY safety shutter, patented by Vimar and subsequently extended to all sector operators free of charge as it was deemed crucially important for ensuring personal safety, prevents any accidental contact with live parts.

## Energy, the universal language around the world.

For impeccable energy management anywhere in the world, Arké is available in all major international standards, for continued safe use at all times.

# CONTROL

Tecnologia

## WIRELESS AND BATTERY-FREE.

Thanks to innovative radiofrequency technologies, lighting control devices can be installed anywhere, without any masonry work, and can be moved at any time.

## In your hands. Anytime, anywhere.

Nothing escapes your control. Spaces can be monitored both centrally from a single touch screen and locally through individual devices, or remotely over the Internet using a smartphone or tablet, allowing you to manage everything, wherever you are.

### RAISE OR LOWER ROLLER SHUTTERS WITH A SIMPLE GESTURE.

An array of solutions, also integrated in the By-me home automation system, allows you to open and shut roller shutters, curtains and venetian blinds with supreme ease.

### LIGHT SHAPES AND DECORATES SPACES.

Adjusting the light intensity to suit your mood or creating special light effects with the RGB colours is now simple and intuitive.

### THE NETWORK COVERS ALL ROOMS.

The access point is the ideal solution for extending your Internet connection throughout your home, even to areas that are not reached by the Wi-Fi signal or where the signal is weaker.

## PERFECT VISIBILITY EVEN IN THE DARK.

LED step marker lamps subtly illuminate any area, guaranteeing visibility and safety even at night.

## A COMPREHENSIVE MULTIMEDIA EXPERIENCE.

Tablets and smartphones can be rapidly charged at any time thanks to dedicated High Power ports.

Tecnologia

### YOUR FAVOURITE MUSIC IN EVERY ROOM.

Simply activate Bluetooth on your smartphone, and music spreads through the rooms with maximum power and sound quality.

### LIGHT FOLLOWS YOU EVERYWHERE.

A removable torch provides portable emergency lighting, coming on instantly in the event of a blackout.

### ENVIRONMENTAL CONDITIONS ARE ALWAYS OPTIMAL.

A sensor accurately measures the temperature and level of humidity in the air. It then communicates with the temperature control system to maintain the ideal ambient conditions at all times.

## Creating the perfect atmosphere takes only a moment.

Recreate your favourite environmental conditions immediately, thanks to functions that also use set scenarios, offering coordinated management of lighting, sound system and curtains or roller shutters, for all-round total comfort.

## INTELLIGENT ENERGY MANAGEMENT.

The energy profile is monitored constantly, as are water and gas consumptions, individual appliance loads and the energy produced by any photovoltaic system.

## How to obtain maximum efficiency without compromises.

Optimising consumption without compromises. With its smart technology, Arké guarantees superb climatic comfort, power consumption monitoring of rooms, perfect management of loads and distribution of photovoltaic energy. To let you consume less and live better.

### THE TEMPERATURE IS ALWAYS AS YOU LIKE IT.

Thermostats and timer-thermostats for all types of temperature control systems allow optimal climate management. They also indicate when the comfort temperature has been exceeded, thus encouraging greater energy awareness.

### LIGHT ONLY WHEN YOU NEED IT.

Presence detectors switch lights on and off only when someone passes, avoiding energy waste and creating pathways lit step by step.

## Living in a protected world.

---

Protected from intrusion, kept safe with video camera surveillance,  
access control systems and protection against gas leaks and flooding.

Thanks to outstanding products and technologies, your home  
always feels safe, for your peace of mind.

### MONITORED, SECURE SPACES.

Stand-alone and expandable with a wide range of devices, By-alarm is an efficient burglar alarm system that can be integrated with the By-me home automation system, offering maximum protection.

### HIGH-RESOLUTION COMMUNICATION.

Elegantly designed touch screens provide traditional video entryphone functions and can also be used to manage all functions throughout the building.

### ALL MOVEMENTS ARE ACCURATELY DETECTED.

Detectors positioned at strategic points throughout the home efficiently and reliably identify the presence of any unauthorised persons in the building.

DIFFERENT MODULARITY FOR  
MADE-TO-MEASURE SYSTEMS.

From 1 to 21 modules, also integrated.

Many possibilities offering the  
utmost freedom of composition.

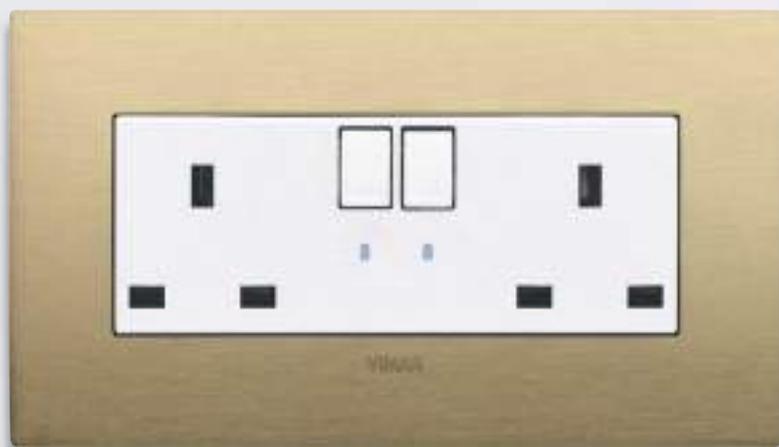

International

MADE IN ITALY WITH AN

To cater to the different usage requirements in various countries, Arké offers a wide range of devices in all major international standards and is characterised by superb modularity and installation versatility, with impeccable energy management and the highest level of safety.
