

## EDV6X DOOR ENTRY

**VIEW**   
IoT smart life

one-family

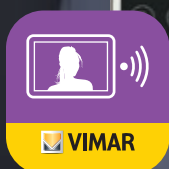

two-family

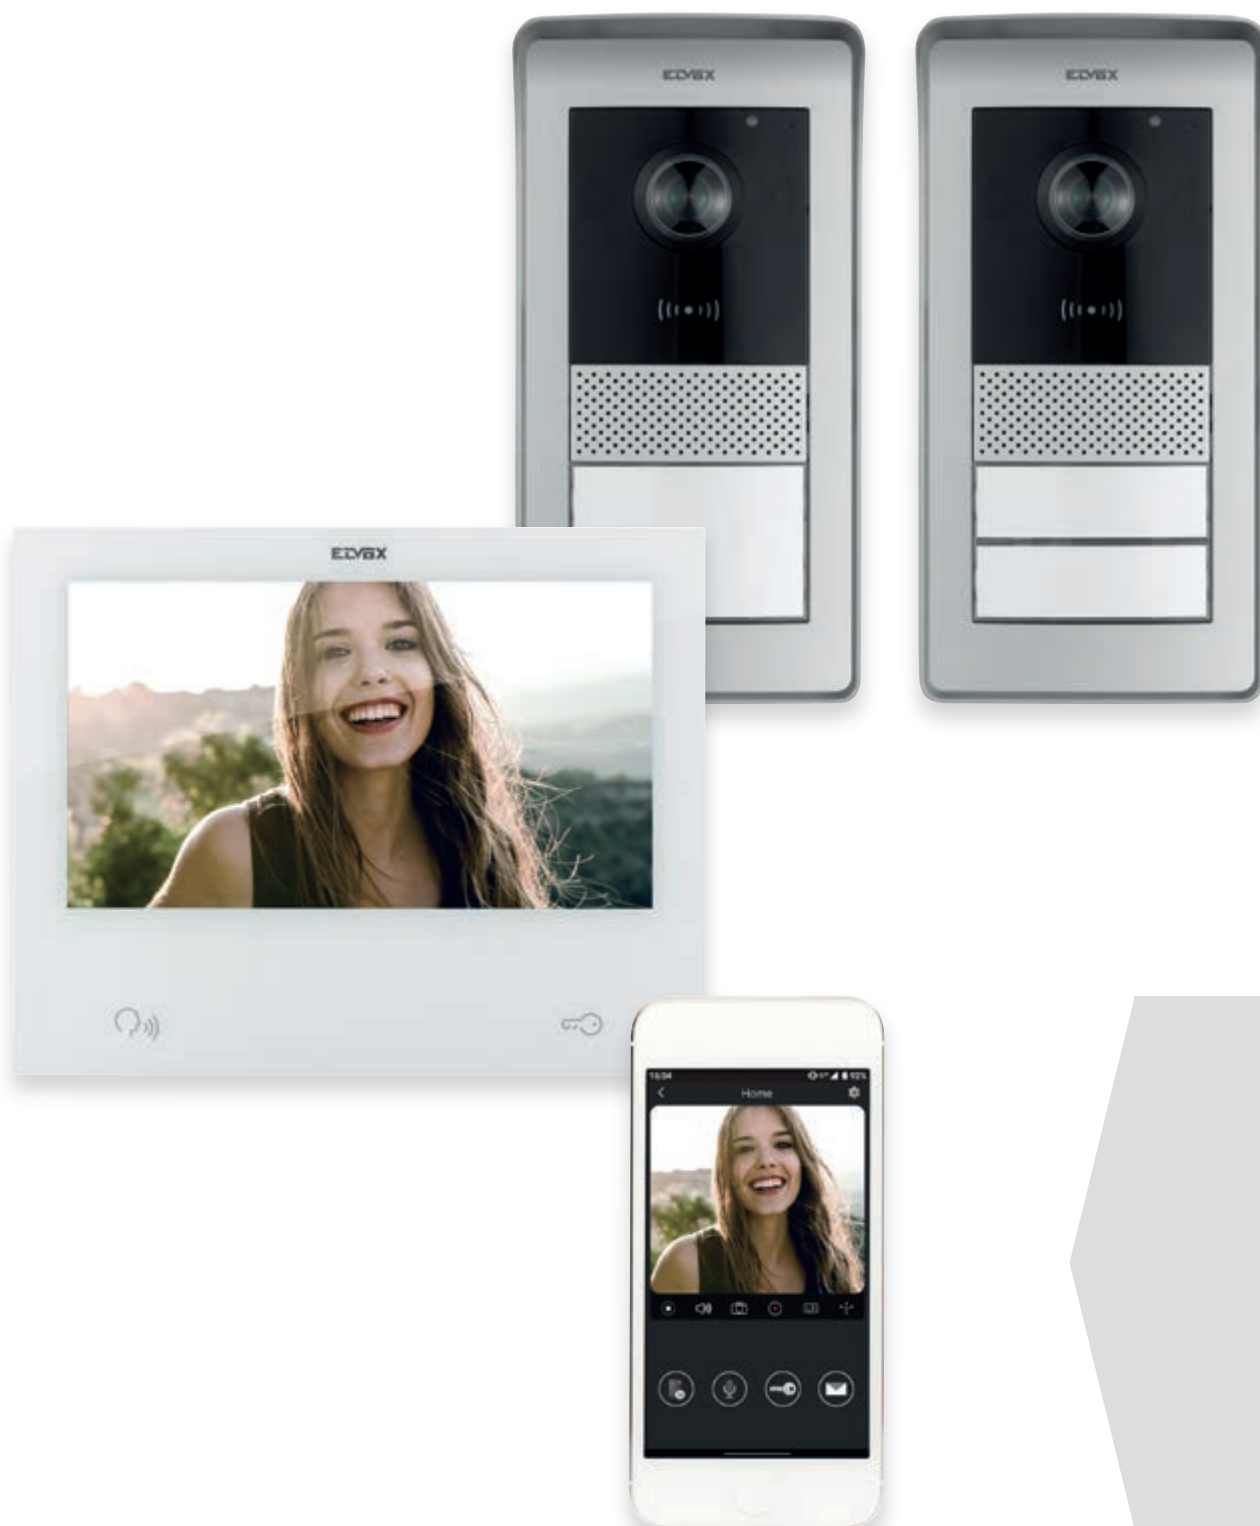

**IP over 2 wires.**  
High performance and  
simple wiring.

**View Door**  
App

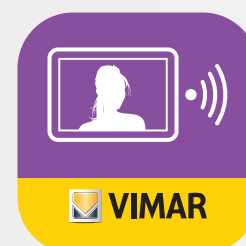

The performance of IP technology comes together with the simplicity of 2-wire wiring.

High-performance and easy to install, **with just 2 wires**, the video door entry kits allow you to check who is ringing at your door, even when you're out. Thanks to the **monitor with integrated Wi-Fi** and to the **View Door** App, you can receive and manage video door entry calls directly from your smartphone or tablet.

Our video door entry kits all boast **Full-HD video quality** (2 Mpx resolution), a wide **recording angle** (160° wide angle lens) and allow **up to 3 Wi-Fi cameras to be connected**.

Everything is always under control from your smartphone or tablet.

The **View Door** App is simple and boasts a user-friendly graphic interface, allowing you to **answer video door entry calls** from your smartphone or tablet, to **control the lock** in your home and to **view the pictures transmitted by the outdoor station and by any** cameras installed and connected.

## The IP over 2 wires kits.

**one-family**

**K40980**

IP over 2 wires surface mounting video door entry kit containing: 1 hands-free touch screen monitor, integrated Wi-Fi for call repetition on smartphone with dedicated App, 7" LCD colour display, complete with bracket for surface mounting, 1 audiovideo entrance panel with rain-proof frame configurable for 1, 2 or 4 families with RFID reader with relay output configurable as NO or NC for electrical lock or voltage-free contact, 5 Mifare coloured RFID cards (art. 40169), 1 power supply unit (art. 40105).

**two-family**

**K40981**

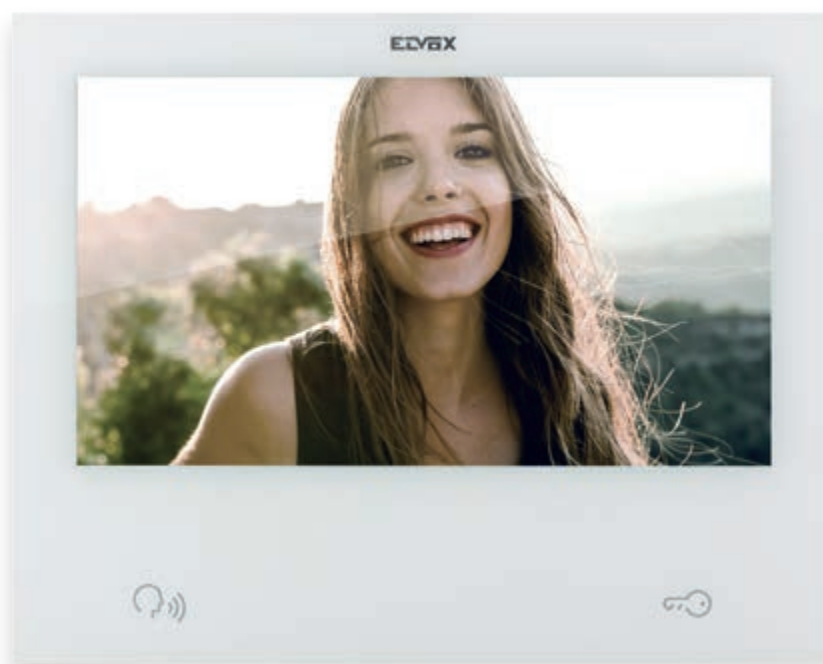

IP over 2 wires surface mounting video door entry kit containing: 2 hands-free touch screen monitors, integrated Wi-Fi for call repetition on smartphone with dedicated App, 7" LCD colour display, complete with bracket for surface mounting, 1 audiovideo entrance panel with rain-proof frame configurable for 1, 2 or 4 families with RFID reader with relay output configurable as NO or NC for electrical lock or voltage-free contact, 5 Mifare coloured RFID cards (art. 40169), 1 power supply unit (art. 40105).

## 9 good reasons to choose our video door entry kits.

- 1**  **Ready to use**  
No need for programming, simply connect the devices with just 2 wires.
- 2**  **Connection with just 2 wires**  
Just 2 wires are required to connect the outdoor station, the power supply unit and the indoor station.
- 3**  **Expandable**  
The system can be expanded by connecting up to 2 indoor stations for each home.
- 4**  **Intercom**  
Calls and conversations between indoor stations installed within the same system are possible.
- 5**  **Voice assistants**  
Compatible with Amazon Alexa voice assistants.
- 6**  **View Door App**  
To receive and manage video door entry calls directly from your smartphone or tablet.
- 7**  **Access control**  
Access control via RFID card reader in the outdoor station (up to 10 different cards).
- 8**  **Wi-Fi camera connection**  
Up to 3 Wi-Fi cameras per apartment can be connected. Vimar cameras supported 46237.040A, 46239.040A and 46241.036A.
- 9**  **2-wire system retrofits**  
When refurbishing existing 2-wire systems, the indoor and outdoor stations can simply be replaced, maintaining the same wiring.

# Monitor with integrated Wi-Fi.

7" touch screen

## Monitor with integrated Wi-Fi

Thanks to integrated Wi-Fi, the indoor station communicates with smartphones and tablets. And video door entry calls can be managed anywhere.

## Micro SD card from 8 to 128 GB

The micro SD card (not included) allows you to capture stills and videos.

## Intercom indoor stations

You can communicate from any monitor to another monitor connected to the same system.

## Multi-language menu

The display menu can be programmed in 8 different languages: Italian, English, French, Spanish, German, Greek, Portuguese and Dutch.

## Video and picture recording

Automatically or in manual mode, you can capture **stills and videos** of the caller at the outdoor entrance panel.

## Wi-Fi CCTV camera

Up to 3 Wi-Fi CCTV cameras per home can be viewed (optional function).

# Outdoor entrance panels.

**Metal**  
**IP54 - IK07**

## Rain guard and name plate

Entrance panels fitted with rain-proof frame, back-lit name plate and surface mounting accessories.

## Protection degree IP54 and IK07

IP54 protection **against dust and water** sprays and IK07 **protection against mechanical** impact.

## 160° wide-angle camera

Equipped with colour camera with **2 Mpx**, wide-angle lens with a 160° horizontal recording angle.

## Full-duplex audio with Echo Cancellation and noise reduction

**Echo Cancellation** means you can have a natural, two-way conversation, automatically avoiding annoying audio feedback (Larsen effect). You will hear loud and clear thanks to the **Noise Reduction** function.

## Multi-language voice messages

Multi-language voice messages in 8 different languages (Italian, English, French, Spanish, German, Greek, Portuguese and Dutch).

## Backlighting of name plate and icons

The LED backlighting makes the name plates clearly visible, as well as the backlit icons which signal the function under way.

## Lock and auxiliary services

An electric lock can be powered directly and an auxiliary service can be connected to the relay output with a programmable activation time.

## Access control

Access control via RFID card reader in the outdoor station (up to 10 different cards).

# You can add Wi-Fi cameras.

You can add up to 3 Wi-Fi cameras per home **to each** IP over 2 wires video door entry kit.

## 46237.040A

Wi-Fi bullet camera, Full-HD resolution (2 Megapixels, 1920x1080), 4 mm fixed focus lens with 90° vision, motion detection functions and notification sending. Supports SD-Cards up to 128 GB (not included), compatible with voice assistants.

## 46239.040A

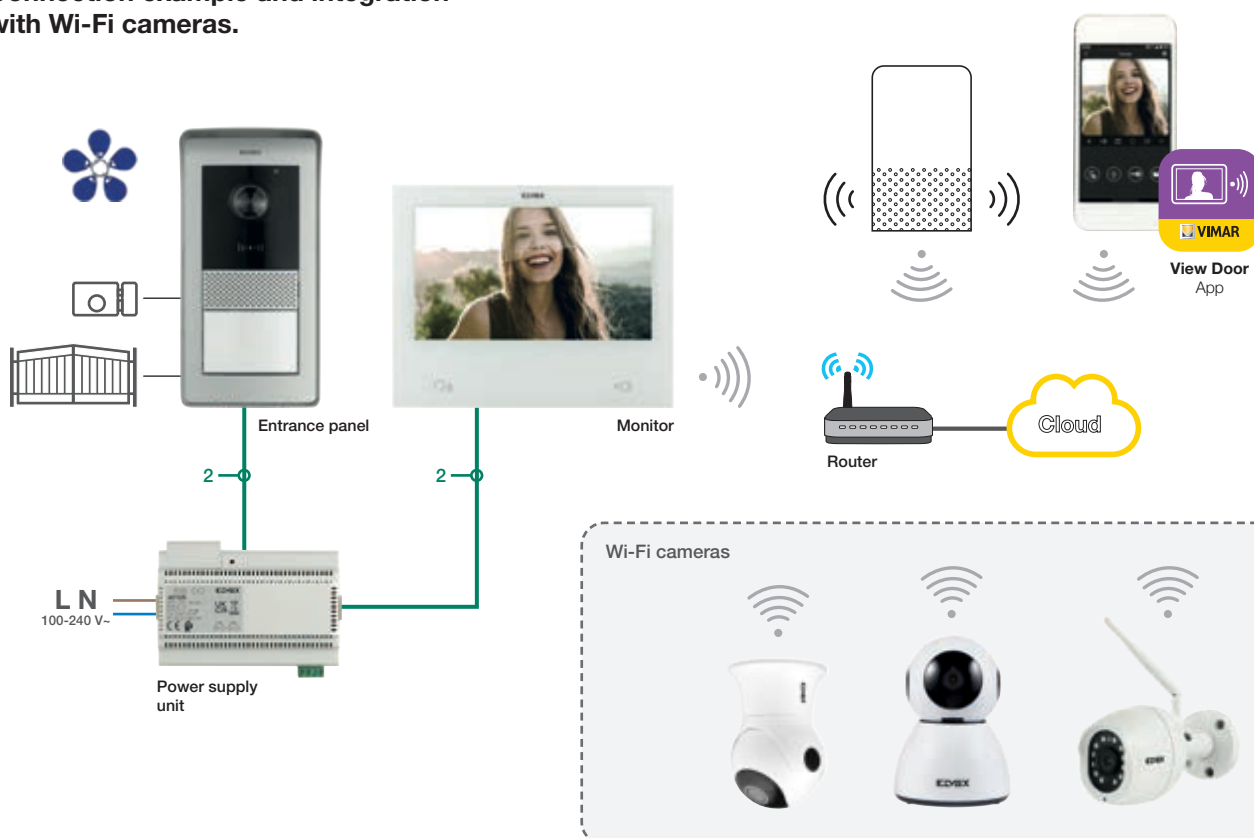

Motor-driven Wi-Fi PT camera, Full-HD resolution (2 Megapixels, 1920x1080), 4 mm fixed focus lens with 96° vision, motion detection functions and notification sending. Supports SD-Cards up to 128 GB (not included), compatible with voice assistants.

## 46241.036A

Motor-driven Wi-Fi PT camera, outdoor installation (IP65), Full-HD resolution (2 Megapixels, 1920x1080), 3.6 mm fixed focus lens with 100° vision, motion detection, audio and notification sending, 32 GB SD-Card included.

## Connection example and integration with Wi-Fi cameras.
