

**PLEATED BLINDS, ROLLER
BLINDS & FLYSCREENS TO FIT
ANY SIZE MARINE HATCH,
PORTLIGHT OR WINDOW**

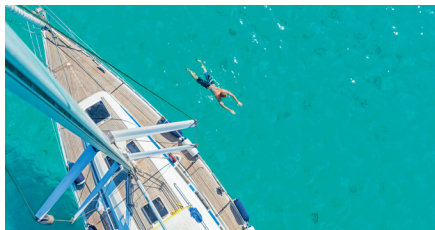

A close-up photograph of light-colored horizontal blinds, showing the texture and slats. The text is overlaid on the left side of the image.

A comprehensive range
of blinds for boats
manufactured in the UK

Seaview Blinds' founders, Ed and Andy FitzGerald – formerly the founder of Oceanair Marine Ltd. – have forty years of blind design experience between them and have built a solid and proven reputation for excellence in product quality and service.

Whether a single shade or a complex project, Seaview has a high quality range of bespoke and off-the-shelf innovative products to meet the most demanding of requirements, all produced in our cutting edge manufacturing facility based on the south coast of the UK to our own exacting standards.

Seaview is at the forefront of product innovation, bringing to market the next generation of shading products including hatch blinds, venetian blinds, pleated blinds, roof blinds, cassette roller blinds, roman blinds, both manual and powered.

Our technical sales, design and production teams are all highly skilled individuals, each with an abundance of industry experience, and more than able and willing to bring your project to life – on time, on budget and with that extra little bit of old-fashioned quality and service thrown in.

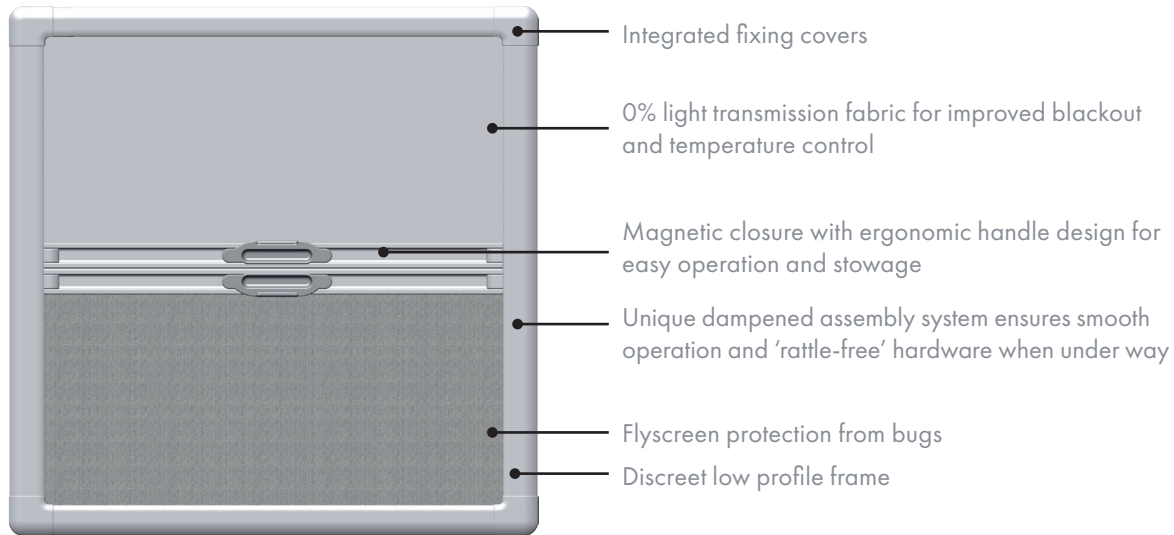

Rest assured, with a wealth of experience in the marine industry, the Seaview team are familiar with and understand the challenges faced by boatbuilders operating within the harsh marine environment.

Via our fast growing international network of distributors, not only are we able to provide innovative, stylish and practical solutions, we are eager and ready to put our skills and experience to the test by taking on the most demanding of briefs. You will not be disappointed.
